

HOLBORNE

swiss audio instruments

We are glad that you have decided on the RPA-3 MkII. With this phono stage in HOLBORNE hybrid technology you have acquired a device whose technology stands completely in the service of the music. The unique circuit design lends a new dimension to the transparency and directness of music reproduction.

To install and connect

- 1 Mount the RPA-3 MkII on a flat underground. Be sure of a minimum clearance of 50mm for the heat dissipation holes.
- 2 Be sure to have turned off the main switch on the rear side.
- 3 Connect your turntable and the following amplifier with the RPA-3 MkII.
- 4 Connect the RPA-3 MkII with the main supply.
- 5 Switch on the main switch on the rear side. Now you can power off and on the amplifier with the push button. The power indicator lamp starts to flash. When the LED glows continuously, the phono stage is ready to work.

Fuse: 230 VAC 125 mA
Fuse: 100/115 VAC 250 mA

* Please turn low the volume of your amplifier when switching
